

A “Must-Have” for KFCs

Kentucky Fried Chicken | 15-store Install | Northeast & Southeast Regions

“PlotWatt is one of the top 5 investments I have made in my business in terms of return on investment.” — Leslie Sharp

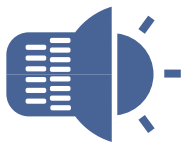

Two Stores

Average monthly electric bill:	\$2,197
Average monthly savings:	\$230
	10.5% average savings

Eight months with PlotWatt energy monitoring.

“I save money and streamline appliance maintenance. Best of all, it takes virtually no time on my part as a franchisee.” — Ray Aley

In a recent three month period:

3 freezer alerts error uncovered

Compressor failure averted

Costly Errors

PlotWatt tracks stores’ actual usage, which uniquely equips us to spot billing errors that otherwise would go undetected. Our energy analysts found an anomaly that would have led to a \$6,100 overcharge for the year.

Hot Discoveries

We were able to alert the restaurant that heating elements had burned out in several fryers. Undetected, they required employees to cook food longer, a waste of time and energy.

Cool Savings

PlotWatt noticed that compressors were working overtime on several coolers. Timely intervention helped KFC avoid total compressor failure, as well as the resulting equipment and inventory replacement costs.
